# Doktor znanosti/doktorica znanosti s področja pomorstvo in promet

---

## Selected qualifications

<b>Name of qualification</b>	Doktor znanosti/doktorica znanosti s področja pomorstvo in promet
<b>Translated title (no legal status)</b>	Doctor of Philosophy in the field of maritime studies and transport
<b>Type of qualification</b>	Doktorat
<b>Category of qualification</b>	Izobrazba
<b>Type of education</b>	Doctoral education
<b>Duration</b>	3 years
<b>Credits</b>	180 credits

## Admission requirements

- A completed second-cycle (Bologna) study programme in any subject or field,
- a completed integrated master's programme leading to professions regulated by EU directives, if consisting of 300 credits, or another integrated master's programme consisting of 300 credits,
- a completed former (old) study programme leading to an academic higher education qualification,
- a completed former (old) study programme leading to a specialisation, a completed professional higher education programme in the field of maritime studies/transport/traffic/transport logistics or a natural science, engineering or social science field. Additional course units totalling 30 to 60 credits are set for such candidates before enrolment in the doctoral programme by the Doctoral Studies Committee at the Faculty of Maritime Studies and Transport. Enrolment in the Maritime Studies and Transport doctoral study programme is also open to graduates of foreign universities. The equivalence of prior learning in another country is established by means of the procedure for the recognition of foreign qualifications for the purposes of continuing education, in accordance with the regulations that apply to the University of Ljubljana.

## ISCED field

Field  
Transport, varnost, gostinstvo in turizem, osebne storitve

## ISCED subfield

subfield transport

## Qualification level

SQF 10  
EQF 8  
Third level

## Learning outcomes

Qualification holders are qualified to:

- identify, understand and define fundamental scientific problems,
- resolve complex user-centric scientific challenges and in this connection organise and coordinate research and development work in the field of maritime studies and transport,
- show a capacity for abstraction with well-developed critical, analytical and synthetic thinking,
- identify the necessary data for the formulation of new knowledge and technical/technological and organisational solutions,
- make interdisciplinary connections between scientific findings,
- work as part of a team in a narrower or broader interdisciplinary field,
- formulate new theoretical knowledge and applied technical solutions based on it, taking into account environmental and social responsibility and observing the engineering code of ethics,
- use modern research methods and procedures,
- communicate with a specialised public in various ways,
- critically assess and present own research results, keep abreast of development around the world

and in this connection pursue further independent learning and research and keep abreast of literature.

## Assessment and completion

Students' knowledge is assessed by means of practical exercises and seminar papers, and also via products, projects, performances, services, etc. and by examinations. Examination performance is scored as follows: 10 (excellent); 9 (very good: above-average knowledge but with some mistakes); 8 (very good: solid results); 7 (good); 6 (adequate: knowledge satisfies minimum criteria); 5-1 (inadequate). In order to pass an examination, a candidate must achieve a grade between adequate (6) and excellent (10).

## Progression

In order to progress to the next year, students must obtain confirmation of the previous year and have completed all teaching and research tasks envisaged by the programme for that year; for enrolment in an individual year, they must have completed the following: for enrolment in the second year, at least 50 credits, including at least 20 from taught course units from the first year; for enrolment in the third year, all taught course units from the first and second years and an approved doctoral dissertation topic.

## Condition for obtaining certificate

In order to complete the doctoral programme in Maritime Studies and Transport and obtain the academic title of doktor/doktorica znanosti, candidates must successfully complete all course units defined by the programme and successfully defend a doctoral dissertation. The entire programme consists of 180 credits.

## Awarding body

Faculty of Maritime Studies and Transport, University of Ljubljana
