- Manufacture work devices by using technical documentation;
- Manufacture independently composite elements, assemblies, semi-finished and finished products;
- Cut and join/bond composite elements;
- Perform surface processing of composite elements, assemblies, semi-finished and finished products.

Accessors

Verification and assessment are carried out by committees for the verification and validation of national vocational qualifications, appointed by the National Examination Centre (NEC). Committee members must be licensed by the National Examination Centre. Licences may be found <u>here</u>.

Assessment and completion

Assessment methods

In practical work assignment, the candidate proves inside a workshop or simulated situation that he/she

masters the professional competences required by the professional standards and technical documentation. Alongside the written version of the assignment, the candidate will also defend this assignment.

Condition for obtaining certificate

Candidates demonstrate attainment of the knowledge, skills and competences defined in the catalogue of standards of vocational knowledge and skills.

Awarding body

Providers of procedures for identifying and validating NVQs are entered in a register of providers maintained in the collection of the national information centre for vocational qualifications. These are: vocational schools, businesses, B2B training centres, adult education centres and chambers of commerce.
