Field
Tehnika, proizvodne tehnologije in gradbeništvo

ISCED subfield

subfield lesarska, papirniška, plastična, steklarska in podobna tehnologija

Qualification level

SQF 5
EQF 4

Learning outcomes

The holder of the certificate is qualified to:

- select appropriate materials based on their properties by bearing in mind utilitarian and aesthetic properties of products;
- select appropriate construction binders in accordance with material and product purpose;
- determine patterns and optimum material use;
- set technology parameters in working solid wood and wood materials;
- design simpler technology procedures and provide for time planning of production;
- determine time and material to be spent and make calculations;
- elaborate technical documentation by using IT tools;
- plan and organise work place in the technology process;
- take into consideration and implement environment protection and health and safety at work regulations;
- act in line with project management principles;

Optional:

Production process administration

- understand basic principles of business process practice, planning and cost management as well as quality management system;

Interior design

- cooperate in product design by being acquainted with anthropometry, ergonomics and furniture styles throughout history;

Sawn wood manipulation and drying

- cooperate in work organisation at a sawn wood facility and in facility and machine management for technical wood drying.

In addition, the holder of the certificate also upgraded his/her key professional skills and competences with key general knowledge and skills in line with national standards.

Assessment and completion

Students' vocational abilities and skills and the fulfilment of conditions to obtain credits in accordance with the relevant education programme are established through verification and assessment. Assessment of students also takes into account non-formally acquired knowledge, which must be adequately demonstrated. Students are assessed using grades from 5 (excellent) to 1 (inadequate).

Progression

Students may progress to the next year if at the end of the academic year they achieve a passing grade in all general education subjects and relevant vocational modules set out in the school's operational curriculum, and have completed all extracurricular activities and practical on-the-job training, or progress on the basis of a programme faculty decision.

Transitions

Matura/vocational course, higher vocational education (SQF level 6), professional higher education (SQF level 7) and academic higher education (SQF level 7)

Condition for obtaining certificate

Students must successfully (i.e. with passing grades) complete all general education subjects, compulsory vocational modules, elective vocational modules and the open part of the curriculum. They must also complete extracurricular activities and work placement requirements and pass the vocational matura examination. The vocational matura comprises a compulsory section (written and oral examinations in Slovene and wood industry) and an elective section (written and oral examination in a foreign language or mathematics and a product/service with oral presentation).

Awarding body

Vocational and technical secondary schools and adult education institutions.
