Learning outcomes

The qualification holder will be able to:
(general competences)

- demonstrate understanding above all of the economic, financial and institutional environment of an organisation and, consequently, analyse this environment,
- autonomously apply knowledge of economic and financial theory and carry out practical analysis,
- analyse the consequences of changes in an organisation for its economic environment and the consequences of changes in the economic environment for the organisation,
- analyse the consequences of structural, regional and international events on an organisation and its wider environment,
- demonstrate mastery of more complex research methods in order to study the consequences of economic phenomena,
- demonstrate understanding of the wider ethical and moral framework of the economic environment and successfully offer responses to challenges or questions through cooperation and teamwork that remains within the context of economic and business ethics,
- generate and critically evaluate bold and innovative ideas relating to the operations of an organisation in the economic environment, both domestic and international,
- take responsibility for their own work or the work of groups in which they take part or which they lead,

(subject-specific competences)

- demonstrate understanding of the economic, financial and institutional environment of an organisation,
- address the most complex technical problems by applying the methods of economic analysis,
- autonomously plan and conduct research projects for the management needs of an organisation,
- demonstrate substantive understanding of the changes of current economic movements and anticipate their consequences,

- demonstrate substantive understanding of changes in economic and financial environment and instruments,
- place current economic and commercial problems in a narrower context,
- integrate knowledge acquired in the field of economic analysis with other business sciences,
- apply knowledge from the field of the development of economic analysis for its critical treatment and development,
- apply approaches that are (more) appropriate for the global economic environment,
- apply methodological and technical solutions to economic analysis.

Assessment and completion

Examination performance is graded as follows: 10 (excellent); 9 (very good: above-average knowledge but with some mistakes); 8 (very good: solid results); 7 (good); 6 (adequate: knowledge satisfies minimum criteria); 5-1 (inadequate). In order to pass an examination, a candidate must achieve a grade between adequate (6) and excellent (10).

Progression

Students may progress to the next year if by the end of the academic year they have completed all course units prescribed by the study programme for progression to the next year.

Transitions

Third-cycle doctoral study programmes (SQF level 10)

Condition for obtaining certificate

In order to complete the programme, students must complete all 120 credits envisaged by the study programme.
