Learning outcomes

The qualification holder will be able to:
(general competences)

- obtain, evaluate, analyse and synthesise a variety of data and information,
- demonstrate mastery of research and development methods, procedures and processes,
- develop critical thinking and self-critical judgement,
- critically analyse and synthesise and anticipate possible solutions and consequences,
- apply values, knowledge and skills in theory and practice,
- demonstrate autonomy in professional and research work,
- use information and communication knowledge and skills,
- demonstrate a capacity for ethical reflection and a commitment to professional ethics,
- work in a group and patiently receive and incorporate creative criticism and comments,
- use professional terminology from major and inter-dependent fields such as administrative and organisational sciences, economic and business sciences, sociology and political science and so forth,
- critically use obtained interdisciplinary values, knowledge and skills regarding theories and analysis in theory and of policies in practice,
- interpret their own positions and conclusions,
- critically analyse the causes and consequences of changes both in an organisation and in the broadest economic, social and natural environment that are essential to its sustainable development,

(subject-specific competences)

- critically understand fundamental hypotheses and the historical development of management theory,
- lead research and development and operational work in large, medium and small organisations,
- study, generate, develop and introduce modern managerial solutions through the application of

scientific methods and procedures,
- perform successful and effective planning, organising, managing and supervision of the operation of an organisation or field of responsibility,
- use modern information and communication technology,
- perform ethical and socially responsible designing, planning and evaluation of strategic development possibilities of organisations,
- manage independent entrepreneurial plans and programmes in companies.

Assessment and completion

Examination performance is graded as follows: 10 (excellent); 9 (very good: above-average knowledge but with some mistakes); 8 (very good: solid results); 7 (good); 6 (adequate: knowledge satisfies minimum criteria); 5–1 (inadequate). In order to pass an examination, a candidate must achieve a grade between adequate (6) and excellent (10).

Progression

Students may progress to the second year if they have accumulated 45 credits from the first year.

Transitions

Third-cycle doctoral study programmes (SQF level 10)

Condition for obtaining certificate

Students complete their studies when they gain all 120 credits envisaged in the study programme.
