- design digital solutions in accordance with the guidelines of good user experience and digital accessibility for vulnerable groups
- restore and update the graphic image of digital solutions
- take into account the requirements of market research and trends in the field of digital solutions
- ensure the effectiveness of the integrated operation of the digital solution
- protect health and the environment and act according to the principles of sustainable development

Accessors

Verification and assessment are carried out by committees for the verification and validation of national vocational qualifications, appointed by the National Examination Centre (NEC). Committee members must be licensed by the National Examination Centre. Licences may be found [here](#) .

Assessment and completion

VALIDATION

During the guidance process the candidate prepares a portfolio, which is assessed by a committee. If the portfolio submitted by the candidate contains authentic, valid and adequate proof of the knowledge, skills and competences defined in the occupational standard, the committee may:

- validate the contents of the occupational standard in full,
- validate the contents of the occupational standard in part and define the knowledge, skills and competence to be verified,

- refuse to validate any of the contents of the occupational standard because the candidate has not provided proof of any of the knowledge, skills and competences defined in the occupational standard, in which case it will verify the occupational standard in full.

VERIFICATION METHOD

Practical assessment with oral defense.

Before the direct examination, the candidate produces/designs the following products (can be from a personal collection folder) and makes improvements in front of the committee:

- creation of a digital solution (website, online or/and mobile application), which is delivered via an active link, with which the candidate demonstrates mastery of the work (artistic design, interactivity, integration of elements...) and
- practical implementation of the improvement of the digital solution selected by the commission.

Condition for obtaining certificate

Candidates demonstrate attainment of the knowledge, skills and competences defined in the catalogue of standards of vocational knowledge and skills.

Awarding body

Providers of procedures for identifying and validating national vocational qualifications are entered in a register of providers maintained in the relevant collection of the National Reference Point for Occupational Qualifications. Providers include: vocational schools, companies, inter-company training centres, adult education centres, chambers of commerce, etc.
