

European Digital Credentials for Learning

Koen Nomden

Slovenian Conference on micro-credentials, 10 May 2022

SOME BENEFITS OF DIGITAL (INSTEAD OF PAPER) CREDENTIALS

Individuals

- can build an online portfolio to track all of their learning while being in full control of their data
- can easily reuse their credentials to get a job or apply for further training all across Europe
- can present and have their credentials verified at any point in their career

Employers

- can reduce the time and cost of verifying credentials and processing job applications
- can better understand the credentials of candidates, especially from other countries
- can trust tamper-proof credentials

Education and training providers

- can reduce their administrative burden and the costs for issuing credentials
- can better understand the credentials of learners, especially from other countries

Framework for digitally signed credentials

definition of a digitally signed credential

- A credential, in its most essential form, is a **documented statement** containing claims made about a person
- A European Digital **Credential for Learning** is a claim related to the learning achievement of a person
- A **digital signature (e-Seal)** guarantees the origin and integrity of the document

Central To the EU's Policy Agenda

Completing the European Education Area (2025)

Europass infosite

Presents information as described on the Europass decision and the first access point to register and use the digital tools.

e-Portfolio

Set of online tools & information to manage every step of your learning and career.

Jobs and Courses Search

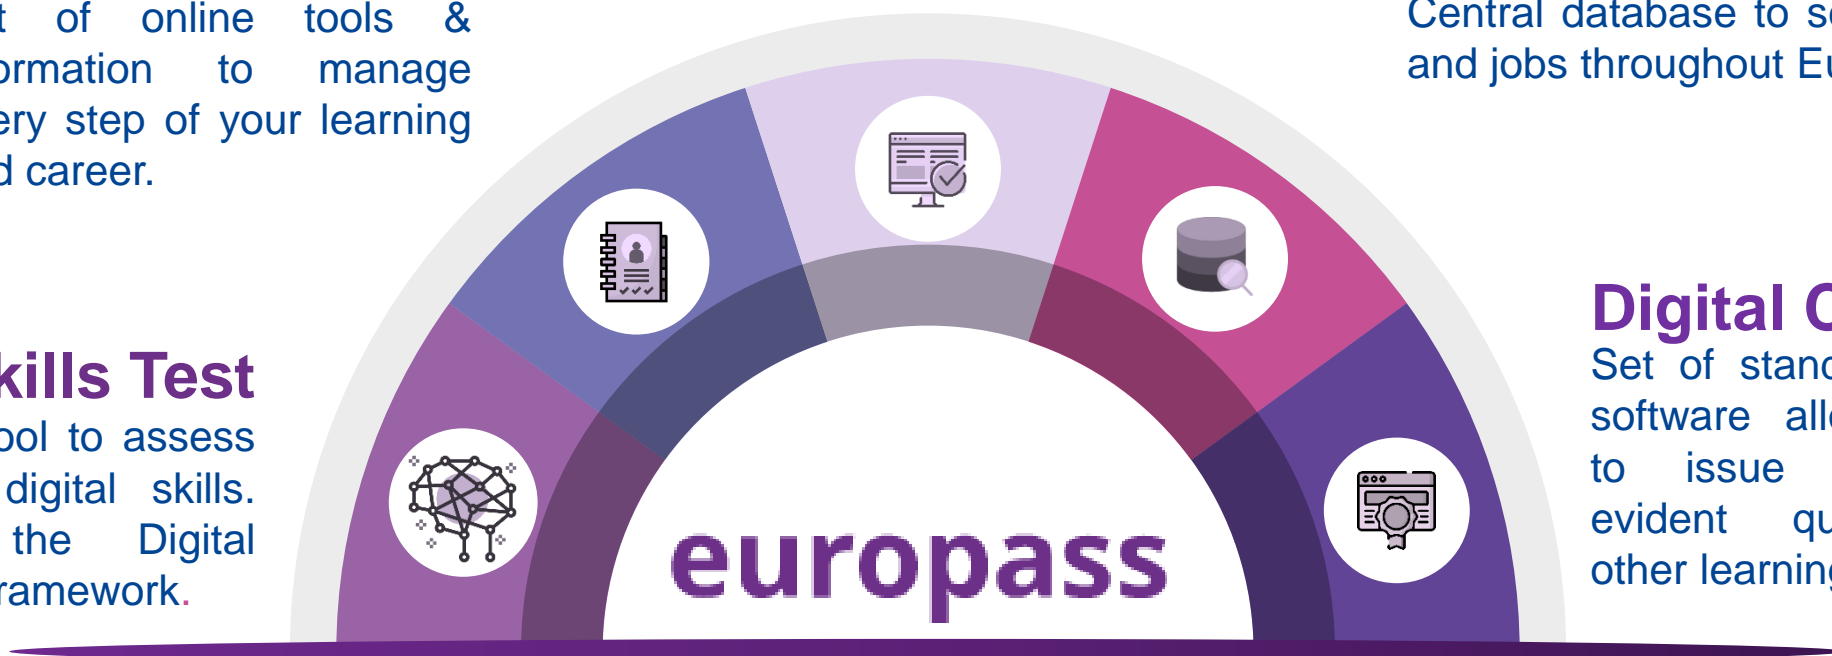

Central database to search for courses and jobs throughout Europe

Digital skills Test

Open-source tool to assess and improve digital skills. Based on the Digital Competence Framework.

Digital Credentials

Set of standards, services & software allowing institutions to issue digital, tamper-evident qualifications and other learning credentials.

Infrastructure & Technicalities

European Digital Credentials for Learning Functions

Issue

credentials and
send them to their
owners

Store

credentials
securely in a
single online or
offline wallet

Verify

if the credential is
authentic, valid and
issued by an
accredited
organisation

Share

the information in the
credential with any
other person or
organisation with just
a click

European Digital Credentials for Learning

components of the infrastructure

This infrastructure encompasses the technical specifications to implement the framework. It comprises the following core building blocks to help operationalise the framework

Standards

Services

Software

European Learning Model

Interoperability Standards

Standards

- First data scheme that provides a vocabulary to describe and document all stages, forms and sizes of the learning lifecycle
 - It is intended to harmonise data models across the continent
-
- Allow users to send data between different systems in a secure manner
 - Communication between the issuer and the wallet and between wallets

EDC ISSUER

EDC WALLET

EDC VIEWER

Services

- Allows credential awarding bodies to prepare and issue degrees, diplomas, certificates of participation or other credentials to learners
- Citizens can store their digital credentials in a secure online space (Europass e-portfolio), and can share them with third parties
- The EDC Viewer is an online interface that displays the contents of credentials, and runs instant authentication and verification checks

Accreditation Database

Courses and Qualifications Search

Open Data Services

Services

- Keeps a record of accreditations and licences and is used to check the authenticity of digital credentials
- Information on qualifications and learning opportunities is available via the Find Courses tool of Europass
- The European Learning Model + vocabularies are made available as linked open data, via an integration with the EU Publications Office

**eIDAS & EDC code
libraries**

Docker images

**Qualifications Dataset
Register (QDR)**

Software & Support

- The Commission has open sourced the entire source code of the EDC Issuer, Wallet and Viewer
- Installable applications that provide a simple solution to implementers who want to use services on their own infrastructure
- Data manager tool that enables national authorities to prepare their data for publication on Europass

Playground

API Libraries

Help Desk

Software & Support

- Allows users to build, award and view test credentials
- Interoperability is provided via APIs which allow for creation of wallets and deposit of credentials into those wallet
- EMPL-ELM-support@ec.europa.eu

The European Learning Model (ELM)

EUROPEAN LEARNING MODEL

- A single data model which can be used at all stages of a learning lifecycle
- Can be applied to any educational/learning process, whether regulated or 'open'
- Includes information on accreditation for regulated/licensed learning
- ELM forms the basis of all EC services in this area, and is also used by MS to send data to the EC
- Work is underway with vendors to integrate ELM natively in educational software

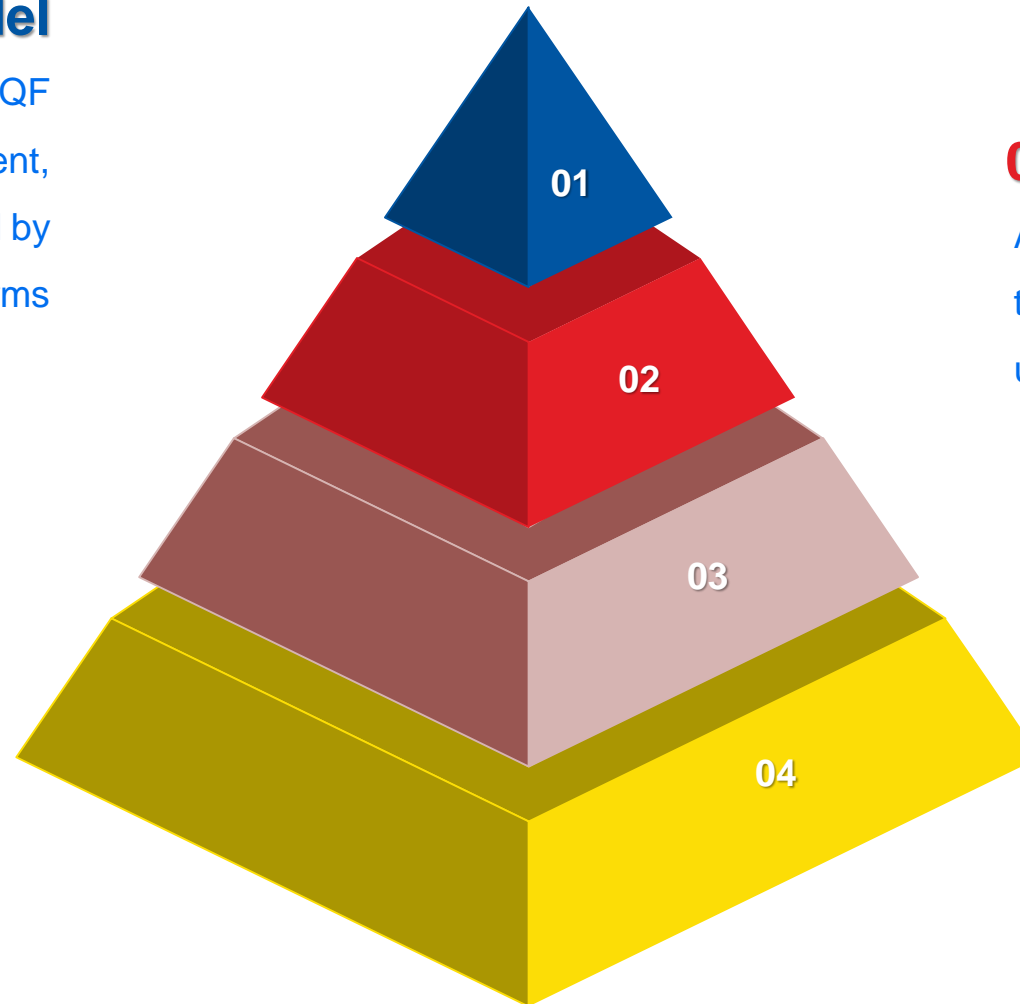

01 European Information Model

Definitions and Standards in EQF

Recommendation, Diploma Supplement,
Europass Decision, etc. supplemented by
glossaries for additional terms

03 Application Profiles

Specific sets of rules for publishing learning
opportuinnities, qualifications, accreditation
and credentials in Europass

02 European Learning Model

A Linked Open Data publication of concepts
to be used in educational and employment
use cases throughout Europe

04 Extensions

National, Regional or Sectoral
extensions of the data model &
application profiles to deal with specific
use cases

EDC Compulsory properties

Ana Andromeda

Sveučilište u Splitu

Master of Science in Civil Engineering

Applied mathematics Study visit

Applied mathematics course

Recognition for credit

Civil engineer

Postgraduate doctoral study

 **Graduate University Study of Civil Engineering**

Sveučilište u Splitu certifies that

Ana Andromeda

has achieved an overall diploma grade of 4 - Very good

Date and place of issue: Split, 21/10/2021 11:57 GMT +0200

Authentication and Verification Check

✓ **FORMAT**

This credential is technically valid.

✓ **SEAL**

Seal description

○ **REVOCATION**

Verification step skipped

○ **ACCREDITATION**

Verification step skipped

✓ **VALIDITY**

The credential is still valid.

🏆 **VERIFIED**

EUROPEAN DIGITAL CREDENTIALS AND OTHER EU INITIATIVES

- Several EU and MS initiatives are developing wallet initiatives and technologies
- Most of these include a 'diploma' or 'educational credential' use case
 - EBSI Diploma use case: under European Blockchain Services Infrastructure
 - EU Identity Wallet (eIDAS): Member States will offer citizens and businesses digital wallets that will be able to link their national digital identities with proof of other personal attributes

- EBSI and the EU Identity Wallet are using ELM as the base model for organising data in the educational domain
